

1. General

Advanced Technology for Security has been active in the Lebanese market since 2004 becoming a leader in the provision of CCTV, Protection, Access Control and Automation.

ATS furthermore specializes in the Design, Supply, Installation, Commissioning and Startup of all Systems, Equipment and Products related to Integrated Security Safety & Telecommunication Systems.

Throughout years of continuous growth, progress and expertise, we have earned extensive experience in installation activities. Our Customers are therefore guaranteed efficient services and comprehensive solutions thanks to our various branches' structure that offer round-the-clock support whenever and wherever required.

ATS offers a trustworthy and professional approach based on the long-term relationship with our valued customers.

1.1. *ATS Advantages*

➤ Experience

Advanced Technologies for Security has an extensive track-record in making and distributing security and related products. ATS is therefore proud to be associated with prestigious projects and an impressive portfolio of sophisticated applications requiring project planning.

➤ Expert Advice

The ATS technical department provides Clients with 24-hour expert advice and support. Every query or situation is efficiently handled by a team of highly qualified specialists in both security and fire alarm equipment.

The ATS service engineers benefit from systematic and regular training seminars, perfecting their initial training program on all new products and services, ensuring they are always one step ahead in today's competitive and buoyant market.

➤ Keeping Track of Orders

Clients' orders are handled by ATS' staff of professionals who provide an efficient and timely response to any request at any stage, from initial contact to delivery.

The ATS staffs use a comprehensive approach in working with Clients to understand the risks to their business and homes and to facilitate the implementation of the best possible security solution.
